Teaching Place Value with

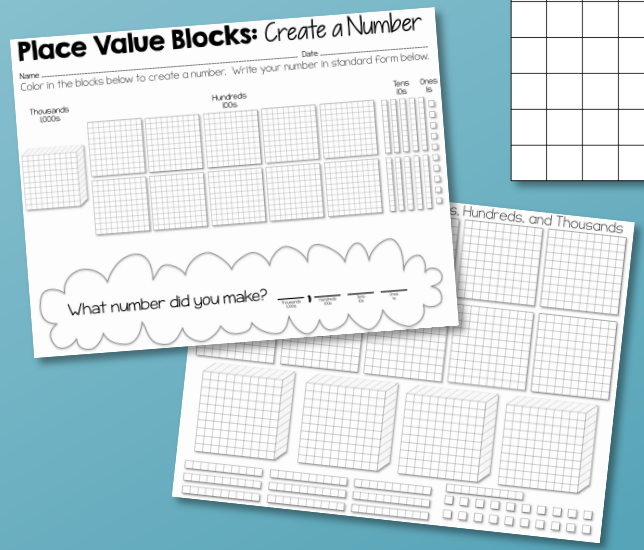

Base Ten Blocks

Full Color Clipart

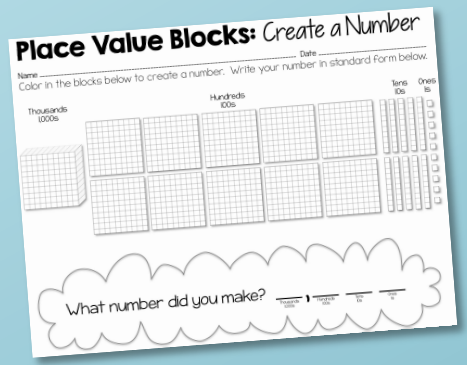

Black Line Clipart

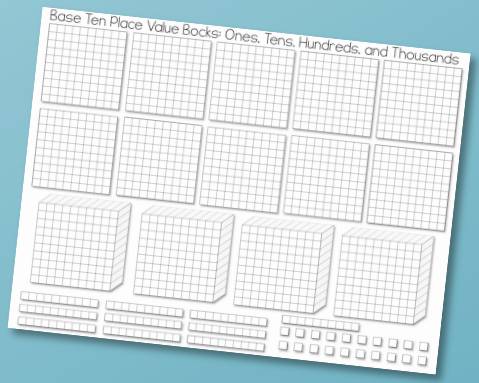

Student Page & Manipulatives

Ideas for Use

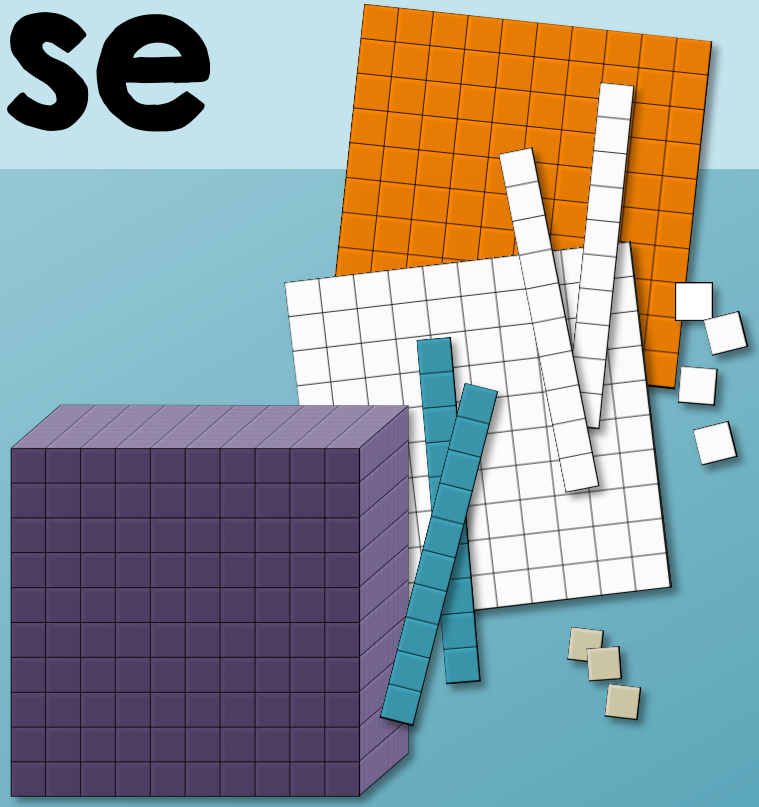

Create a Number Student Page

Have students place a copy of this page in a plastic sheet protector or laminate a copy for them and have the students use dry erase markers to practice creating a number using the place value blocks. Students could roll dice to create numbers using this page as well. Students could also shade the place value blocks and trade with another student to figure out what the value is and write it in standard form. Have fun and be creative with this generic student black line!

Base Ten Blocks Black Line

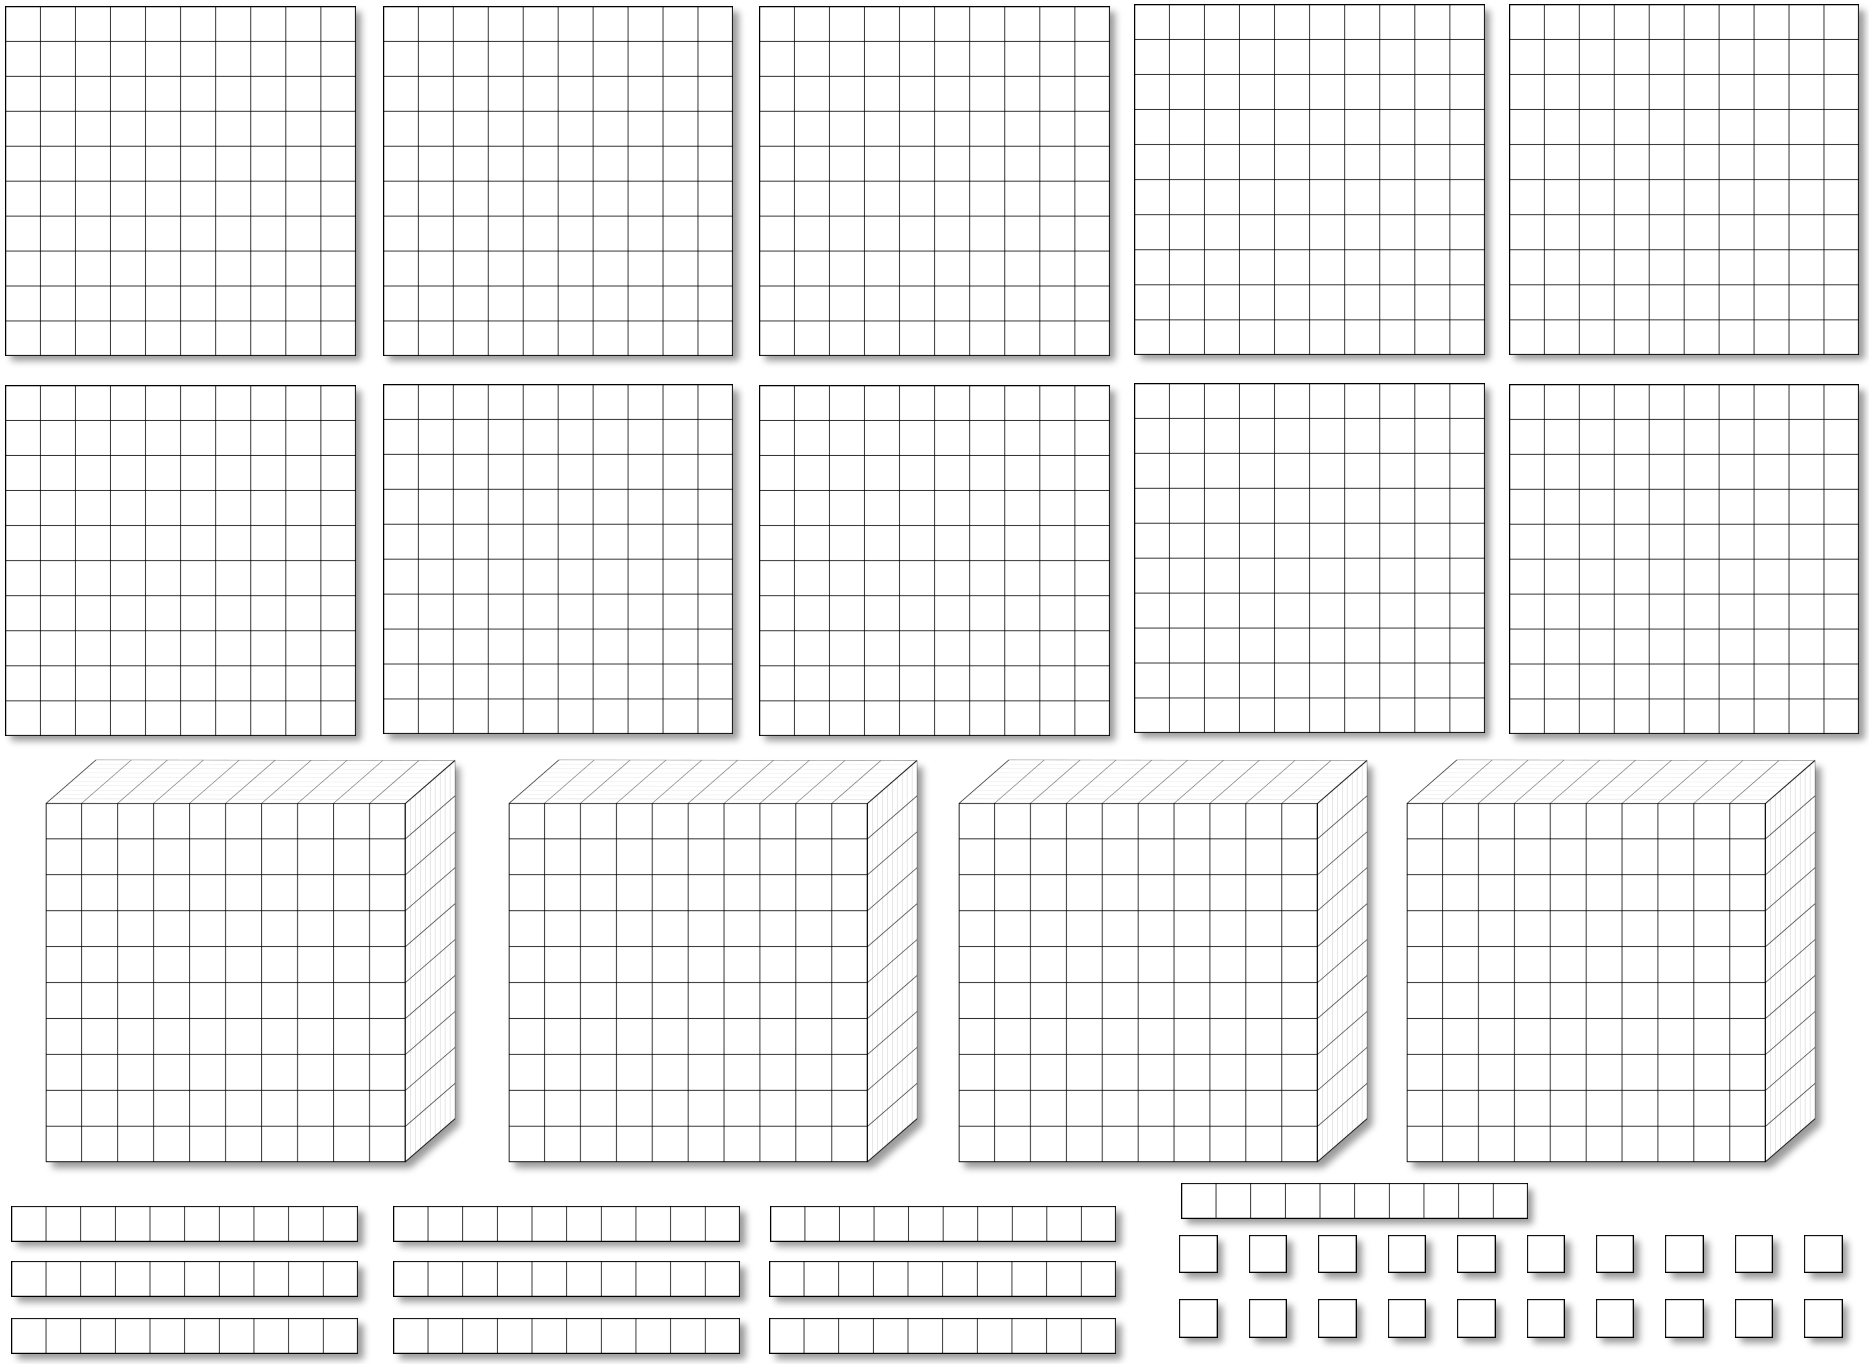

This can be cut out and used as manipulatives for your students. Students could have their our copies or you could print on cardstock and laminate a more sturdy set for centers/group work.

Base Ten Blocks Clipart

Add these graphics to your lesson plans and student pages for your own classroom or TPT creation!
